

SIMPLE COUNTDOWN TIMER FOR OBS V2.2

Some bug fixes in this version

The START button has been fixed from being able to multi-click to a single click only

The small 0:00 at browser source on first loading has been fixed

Instalation:

These instructions must be followed for the correct operation of the Plugin

Works with OBS version 28.0.1

These instuctions are shown on the video

Unzip the folder - Simple Count Down Timer for OBS 2.1..zip - to a folder of your choosing,. The folder doesent matter just keep all progams together and do not move them once the Dock and Browser Source are installed

Open OBS

Install the Timer Control Dock:

Add the Timer Control Dock by clicking on Dock and then Custom Browser Docks

In the Panel that opens

Add a Dock Name (This can be of your choosing)

Add the URL by clicking on Dock.html (from the folder you unzipped the files to) and adding the URL link from the Browser that opens

Click Apply and dock will be created

Place Dock window wherever you wish

Install the Timer Display:

Add the Timer Display by clicking on the Plus icon in Sources and in the Panel that opens

Click on Browser

In Create New add a name of your choosing and click OK and the Propeties Panel opens

Add the URL by clicking on Browser.html (from the folder you unzipped the files to) and adding the URL link from the Browser that opens

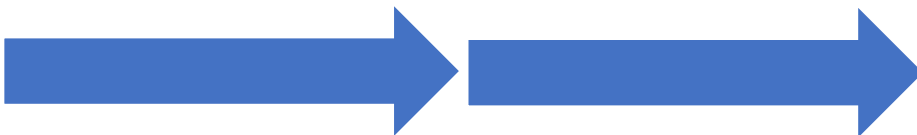

Add Width and Height of your choosing - 1920 x 1080 is commonly used. Horisontal and vertical justification is avaiable in v2

Do not click the 'Local File' box

SIMPLE COUNTDOWN TIMER FOR OBS V2.2

The image displays three versions of a Simple Countdown Timer for OBS V2.2, arranged horizontally. Each version features a dark grey background and a large digital timer display at the top showing '0:00'.

- Version 1 (Left):** Includes a timer display, input fields for 'Minutes:' and 'Seconds:' with 'OK' buttons, 'START', 'STOP', and 'RESET' buttons, and a 'Message At Finish :' field with a 'SUBMIT' button.
- Version 2 (Middle):** Adds a settings panel below the timer. It includes 'FONT' and 'COLOR' tabs, a text area for a Google Font URL (e.g., `https://fonts.googleapis.com/css2?family=Nunito:wght@700&display=swap`), input fields for 'Font Family Name' (Nunito) and 'Font Size' (150), and 'APPLY FONT' and 'RESET FONT' buttons. It also includes 'Timer Text Color' and 'Shadow Color' pickers, 'APPLY COLORS' and 'RESET COLORS' buttons, and a 'SHOW' button for the finish message.
- Version 3 (Right):** Similar to Version 2, but with a simplified settings panel. It includes 'Timer Text Color' and 'Shadow Color' pickers, 'APPLY COLORS' and 'RESET COLORS' buttons, and a 'SHOW' button for the finish message.

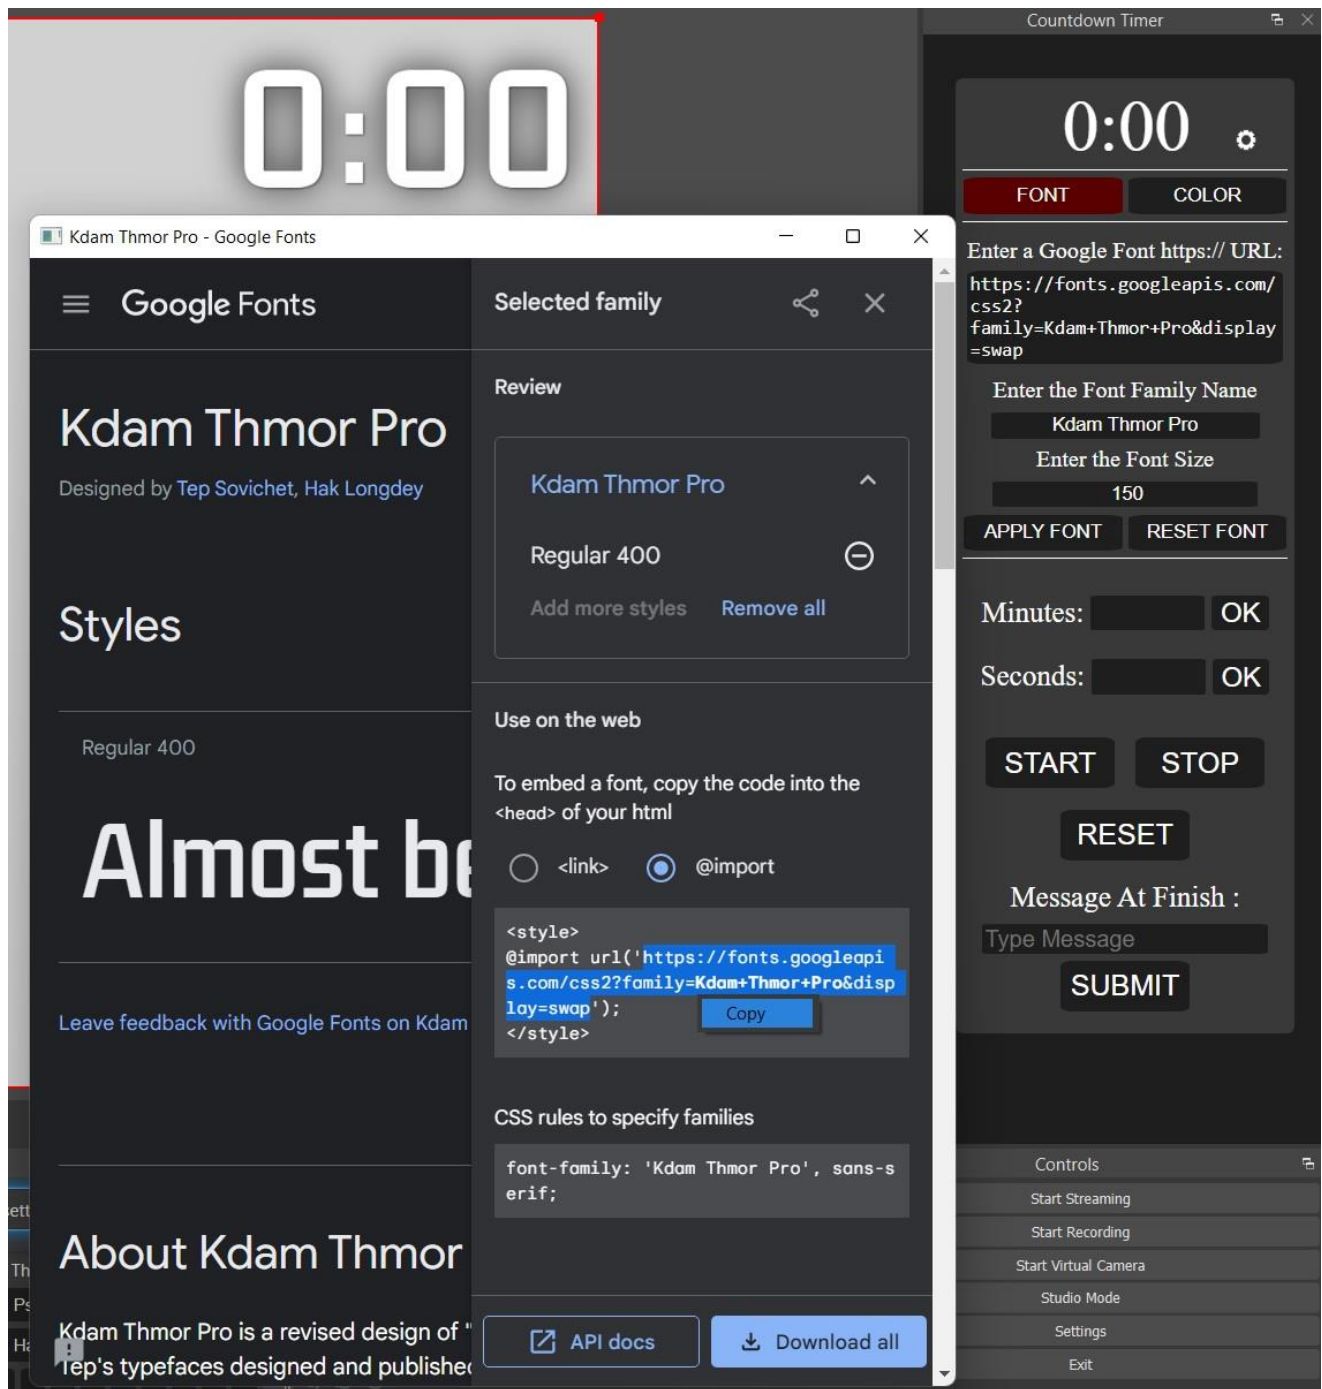

Same Simple Design as version 1 but version 2 has a settings button.

When clicked a settings panel will slide open with options.

When clicked again the settings panel will close.

Same Install method as last version with deletion of the original.

SIMPLE COUNTDOWN TIMER FOR OBS V2.2

To change the font of the Timer and Message on the OBS browser source is simple.

Click on the link 'Enter a Google Font https:// URL:' on the Timer Dock and the Google Font Page will open in a new window.

Choose the font you wish to have and choose 'select this style' after the font style you desire. Then click on the view selected families that is located at the top right of the Google font page. Select the @import option. Copy only the font URL contained in " and paste the URL into the Dock. Also copy the font family name contained in " and paste into the Dock also. Click the APPLY FONT button and your new font will be applied. All settings will be saved and do not require reapplying on an OBS restart, unless reset and/or reapplication is desired. Enjoy.
